

Curriculum Vitae

Full name: Aron Rez D. Arboleda
Job Role: Software Developer
Email: arboleda.aronrez@gmail.com
Phone: +63 929-467-4510
Address: 0295 Cutcut 1st Capas, Tarlac, Philippines

OBJECTIVE STATEMENT

A highly motivated Computer Science graduate from Tarlac State University, Philippines. I've completed multiple case studies and gained experience in setting up desktop and web applications, with both front-end and back-end expertise. I am eager to contribute to innovative projects and gain practical experience in software development or any IT-related field.

EDUCATION

College

Tarlac State University | Tarlac, Philippines **July 2026**
Bachelor of Science in Computer Science

- **Attainment:** Bachelor's Degree in Computer Science
- **Honors:** Magna Cum Laude
- **Relevant Coursework:** Object-Oriented Programming, Data Structures and Algorithms, Desktop App Development, Web Development, Software Engineering

Senior High School

Capas National High School | Capas, Tarlac, Philippines **May 2022**
Science Technology Engineering and Mathematics (STEM)

- **Honors:** With Highest Honor

Junior High School

Capas National High School | Capas, Tarlac, Philippines **May 2020**
Specialization: Computer System Servicing

- **Honors:** With Honors

CERTIFICATES

RAITE Hackathon | Regional Competition | Web3 **Nov. 2024**

- Certificate of Participation

Cisco | CCNAv7: Switching, Routing, and Wireless Essentials **June 2024**

- Configured switches and WLAN

Cisco | CCNAv7: Introduction to Networks **Jan. 2024**

- Studied OSI model and IPv4 and IPv6 addressing

Sololearn | Javascript Intermediate

July. 2023

- Studied Javascript OOP, Methods, Arrays, Document Object Model (DOM), and others

Sololearn | Python Intermediate

Oct. 2022

- Learned Python Data types, Exception handling, Functional Programming, and Data Hiding

TECHNICAL SKILLS

Programming Languages: Typescript, Javascript, Python, Java, C++, PHP
Databases: MySQL, Firebase, MongoDB
Frameworks/Libraries: React, Node.js, TailwindCSS
Tools: Visual Studio Code, Cursor, Git

WORK EXPERIENCE

Web App Developer

May 2026

- Work Type:** Freelance Gig
- Link: <https://liquefact-web.vercel.app/>
- Location:** Tarlac City, Tarlac
- Final Product Deliverable:** Liquefact Web App
- Learned how to integrate a neural network model in a Geographical Information System (GIS)

Desktop App Developer

April 2026 - May 2026

- Work Type:** Freelance Gig
- Location:** Tarlac City, Tarlac
- Final Product Deliverable:** Draft2Dimen v2 Desktop Application
- Modified the application, added local saving, steel formula, and cost computation.

Project Assistant

June 2025 - July 2025

- Work Type:** On the Job Training (OJT)
- Location:** Clark, Pampanga
- Company:** Trackerteer Web Developer Corporation
- Final Product Deliverable:** Inventeer Web App
- Helped maintain inventory, automate product tables, and RFID management

Desktop App Developer

March 2025 - May 2025

- Work Type:** Freelance Gig
- Location:** Tarlac City, Tarlac
- Final Product Deliverable:** Draft2Dimen Desktop Application
- Learned how to work with clients and fellow UI/UX Designer.

PROJECTS

U-Heal

Jan. 2026 - Apr. 2026

React Native, Python, Firebase | Mobile Application | **Bachelor's Thesis**

A mobile eHealth system designed for remote chronic wound monitoring with added tissue classification feature using the U-Net segmentation model.

- Contribution:** Developer of the whole project.
- Link of Web App: <https://u-heal-web.vercel.app/>
- Utilized a segmentation model (U-Net) to improve the effectiveness of remote chronic wound mHealth applications.

- **Relevant Features:** Wound Documentation, Video Call, Chat, Virtual Appointment Scheduling, AI-assisted Wound Analysis, Android App with Web App Dashboard, and Tracking Charts.

Liquefact | React, Typescript, TailwindCSS, Python | Web Application

May 2026

A geographical information system (GIS) that uses machine learning (neural networks) to estimate boreholes information in Tarlac

- **Contribution:** Developer of the project.
- **Link:** <https://liquefact-web.vercel.app/>
- Implemented a neural network using python with a FastAPI backend.

Draft2Dimen v2 | Electron, React, Typescript | Desktop Application

Apr. 2026 - May 2026

A calculator for computing the sizes structural components (e.g. Columns, Beams, Footing, and Slab) and their corresponding rebar and cost computations.

- **Contribution:** Developer of the project.
- Local saving implementation with added cost computation and steel formula.

Arduino-Based Gas and Smoke Warning System

Apr. 2025 - May 2025

C++, Arduino | Electronics

A simple Arduino-based gas and smoke detector device designed as part of a final case study for the Digital Design course.

- **Contribution:** Electronics engineer of the project.
- **Link:** <https://github.com/Aron-Arboleda/GasAndSmokeDetector>
- Arduino implementation with sensors and actuators.

Draft2Dimen | Electron, React, Typescript | Desktop Application

Mar. 2025 - May 2025

A calculator for computing the sizes structural components (e.g. Columns, Beams, Footing, and Slab) and their corresponding rebar computations.

- **Contribution:** Software developer of the application.
- Generated pdf files with @react-pdf library
- Implemented structural components calculations and formula

Liwanag at Dunong Website

Nov. 2024 - Jan. 2025

PHP, MySQL, React, Javascript | Web Application

A full-stack web application that serves as the central web application of the Non-Governmental Organization "Liwanag at Dunong Project".

- **Contribution:** Software developer of the application.
- **Link:** <https://liwanagatdunongproject.ct.ws/>
- Handled volunteer applications with forms and an admin dashboard.

REBYU: Gamified Flashcards

Nov. 2024 - Dec. 2025

PHP, MySQL, React, Javascript | Web Application

A full-stack web application that utilizes pixelated graphics to implement gamified flashcards learning.

- **Contribution:** Software developer of the application.
- **Link:** <https://rebyu.ct.ws/>
- Customized User Interface implementation with a UI/UX Designer.

SPELL: Self-Processing-English-Language-Lender

Apr. 2024 - May 2024

Java with JavaSwing GUI Library | Desktop Application

An application that can manually and automatically edit text, and also provides grammar checking and spelling correction.

- **Contribution:** Main software developer of the application.
- **Link:** <https://github.com/Aron-Arboleda/SPELL-Self-Processing-English-Language-Lender>

- Implemented the LanguageTool API library for Spelling and Grammar Correction.
- Compilation included utilizing the Launch4j and InnoSetup application.

Nom Veterinary Clinic Information System | Visual Basic, VB.NET

May 2023

Desktop Application

An application that provides a computing solution that manages all the necessary information of the fictional clinic establishment

- **Contribution:** Software developer of the application.
- **Link:** <https://github.com/Aron-Arboleda/NomVet>
- Computer Programming 3 Case Study
- Learned how to use Visual Basic in building Desktop Applications

Reminders Builder

Apr. 2023 - May 2023

Java with JavaSwing GUI Library | Desktop Application

A simple app that helps 'build' and create text reminders with efficiency and maintenance.

- **Contribution:** Software developer of the application.
- **Link:** <https://github.com/Aron-Arboleda/RemindersBuilder>
- Computer Programming 1 Case Study
- Learned basic text file database system and how to make GUI Applications

LANGUAGES

- Filipino
- English
- Kapampangan

ORGANIZATIONS

Liwanag at Dunong | Capas, Tarlac, Philippines

Jul. 2024 - Present

- Active Volunteer.
- Web Developer of the Organization.

Programmers' Den

Oct. 2022 - Dec 2022

Tarlac State University | Tarlac City, Tarlac, Philippines

- Member of the Organization.

COMPETITIONS

RAITE Hackathon | Web3 | ICPHubs Regional Competition

Nov. 2024 - Dec 2024

- Member of the hackathon team.
- Certificate of Participation.
